

Double top plate for added strength

Double studs every 48" line up with siding to ensure siding overlaps and stays flush

Diamond plated thresholds protect high traffic areas

Powder coated spring latch barrel bolts for simple, secure latching

Coated ring shank nails provide a more secure joint and reduce corrosion

"L" framed double studs at ends of each side wall and on sides of 2x3 windows for added strength

Gang nail truss plates provide strength to trusses and door frames

Adjustable, zinc barn door braces help maintain squareness

5/8" engineered tongue and groove LP® Prostruct® flooring

ABOUT OUR PRODUCTS

SECURE PORTABLE BUILDINGS offers American-made storage solutions that raise the bar for the whole industry. Our innovative manufacturing facilities are producing superior quality buildings that are sold at an affordable price. Every shed, barn, garage and metal building is handmade and built to last, which is why we offer a 5-year warranty.

METAL STRUCTURES

- Metal buildings are shipped with cross bracing to protect the integrity of the building during transport.
- Metal siding is installed in a horizontal position which adds strength to the overall structure. On styles where vertical metal is available, 2x4 horizontal bracing is added between every stud for additional strength.
- Metal roofing is installed vertically to minimize the buildup of debris, snow and water.

FLOOR SYSTEMS

- Floor systems are constructed with pressure treated 2x6 joists. Floor joists are set and nailed on top of ground contact-rated, pressure treated 4x6 notched runners.
- Garages utilize 3/4" flooring and 12" on-center joist spacing. All other styles come standard with 5/8" LP® ProStruct® flooring spaced 16" on center.
- Engineered tongue and groove flooring is water resistant, helps prevent gapping and separation and adds overall strength and rigidity to our structures.
- Flat joists are secured to the runners at front and rear with lag bolts for additional strength.
- 5/8" LP® Prostruct® flooring makes cleanup easy and is backed by a 1/10-year limited warranty.

SECURE PORTABLE BUILDINGS PROUDLY OFFERS A 5-YEAR WARRANTY!

If you find a defect in the materials or craftsmanship during the first 5 years you possess a new SECURE PORTABLE BUILDINGS structure, we will repair it free of charge. We strive to build and sell high quality products at a fair price with superior customer service.
